TIPS ON HOW TO MEASURE YOUR KITCHEN

Measure from outside trim/casing to outside trim/casing around windows and doors. Please include on your floorplan drawing, the ceiling height measurement from finished floor to ceiling. If you have a soffit above your wall cabinets, also provide finished floor to bottom of soffit measurement.

Other helpful information is a list of the model #'s of all appliances you will want in your kitchen layout design. If you plan on purchasing any new appliances, please provide those as well. Lastly, please e-mail your Designer a few photos from different angles of your existing kitchen space.

Note: We will confirm all final measurements before processing orders for cabinetry. Countertop final measurements are confirmed at the time of template, by the fabricator/installer.
